

## ■ Project 1: Video Caption Editing & Quality Review

Purpose: Show ability to edit captions for grammar, context, and guideline alignment.  
Repo name: video-caption-quality-review

### Example raw\_captions.txt:

```
0:00:01.000 --> 0:00:03.000
welcome to todays session

0:00:04.000 --> 0:00:07.000
we will discuss the financial report for quarter 2
```

### Example edited\_captions.txt:

```
0:00:01.000 --> 0:00:03.000
Welcome to today's session.

0:00:04.000 --> 0:00:07.000
We will discuss the financial report for Quarter 2.
```

### caption\_review\_report.md:

- Fixed grammar and punctuation.
- Capitalized the start of sentences.
- Corrected possessive form (today's).
- Applied style guideline for proper noun capitalization (Quarter 2).

## ■ Project 2: AI Training Data – Text Annotation & Cleaning

Purpose: Show ability to prepare content for AI models (text cleaning, annotation).  
Repo name: ai-training-data-annotation

### Example raw\_dataset.csv:

```
id,text
1,customer want to CLOSE account asap
2,refund Processed but not reflected
3,delivery was late.!! want compensation
```

### Example cleaned\_dataset.csv:

```
id,text
1,Customer wants to close account as soon as possible.
2,Refund processed but not reflected.
3,Delivery was late and customer wants compensation.
```

### annotation\_guidelines.md:

- Correct grammar and spelling.
- Remove unnecessary spaces and symbols.
- Ensure consistent sentence casing.
- Preserve the original meaning while making it clear and professional.
